

## Tips From the Designers for Flush Design Bridal Albums

*We know that choosing images for your album is very difficult. Please consider a few of these tips when picking them.*

- Choose photos that best tell the story of your day. Don't forget to include bride prep, groom prep, ceremony, and highlights from your reception.
- It is hard to tell a story with formal pictures, so try to limit them. Instead try to narrow it down to less than eight.
- Don't forget to include details from your day such as flowers, rings, invitation, cake, favors, etc.
- Please note- Black and white photos cannot be changed into color. They can only be made into sepia. Color photos can be changed to black and white or sepia.
- If you decide to add more images than what is in your contract, the cost is \$20 per image extra. If you go over 100 images for an 11x14 album, you must upgrade to a two-volume set, which is \$1000, plus the additional images. For a 10x10 album, you cannot go over 80 images without upgrading to a two-volume set.
- When submitting your bridal album form, make sure you included the full jpeg number (for example: JGHM0874), if you want a vertical or horizontal album, and if you want collage style or gallery style.

*We hope to make the process of telling the story of your day easier by sharing these tips with you. Please don't hesitate to contact us with any questions, concerns, or assistance.*
